Prevention and control of diabetes in Pacific people

Diabetes is a major problem worldwide. Among Pacific people, prevention and control of diabetes lies in counteracting rapid changes in lifestyle and must take account of political and economic factors and social structure Early studies clearly showed that while diabetes was virtually non-existent in ...

Pacific Islander Diet

Traditional Cooking Methods and Food Habits. Starchy foods are the foundation of the traditional diet. For example, the traditional Hawaiian diet is 75 to 80% starch, 7 to 12% fat, and 12 to 15% protein. Starch in the diet comes primarily from root vegetables and starchy fruits, such as taro, cassava, yam, green bananas, and breadfruit.

WPRO | Health systems development in the Pacific

Health systems development in the Pacific Global and Regional Situation Summary. WHO recognizes the need

of Member States to strengthen their health systems and the need of WHO to improve its own capacity to assist them in doing so.

Premastication

Premastication, pre-chewing, or kiss feeding is the act of chewing food for the purpose of physically breaking it down in order to feed another that is incapable of masticating the food by themselves. This is often done by the mother or relatives of a baby to produce baby food capable of being consumed by the child during the weaning process. The chewed food in the form of a bolus is ...
